CTK Butyl Headlight Cord

Technical characteristics

Packing	10 package in 1 box
Thickness	6 mm.
Meters per package	11
Weight per package	0.362 kg.
Package on pallet	48

Sealing butyl cord is a self-adhesive sealing material based on butyl rubber in the form of an uncured gray plastic mass. The cord has high adhesion (stickiness) to metal, plastic and glass, which ensures reliable sealing. The material is resistant to temperature extremes. It is used for sealing joints, insulation during installation of automotive headlights, in order to prevent dust and moisture from entering the headlamp.

Designed: insulation and sealing during installation of automotive headlights. Produced in the form of a cord.

Where to use?

Door	
Hood	
Trunks	
Floor	
Ceiling	
Wheel arches	
Other areas
